

EMPATHY MAP CANVAS – Garage Management System (GMS)

IDEATION PHASE – Empathize & Discover

Date	04 NOV 2025
Team ID	NM2025TMID05906
Project Name	Garage Management System
Maximum Marks	4

The empathy mapping helped our team deeply understand the needs, challenges, and motivations of all key users — which guided our design and functionality decisions for the GMS project.

Stakeholder	Thinks	Feels	Says	Does
Customer (Vehicle Owner)	"It's hard to track my vehicle's service details and billing."	Feels frustrated and wants transparency.	"I just want quick updates and easy service booking."	Books service appointments and checks status through the system.
Mechanic/ Technician	"Managing multiple jobs manually is confusing."	Feels stressed and wants clear task allocation.	"I need a list of pending services and parts availability."	Updates job status and service reports in the system.
Garage Owner/Admin	"How can I manage staff, inventory, and customers efficiently?"	Feels responsible for smooth garage operations.	"I'll monitor performance and ensure better customer service."	Manages employee records, service logs, and reports using Salesforce.
Supplier (Spare Parts)	"Sometimes I don't know when parts are low in stock."	Feels unsure and reactive instead of proactive.	"I can deliver parts faster if I get early notifications."	Responds to automated inventory alerts and restocks parts on time.
