

PHASE 3 – PROJECT DESIGN PHASE

Date	01 NOV 2025
Team ID	NM2025TMID05906
Project Name	Garage Management System
Maximum Marks	2 Marks

Key Features:

1. Customer & Vehicle Registration: Customers can register their details and vehicle information through the Salesforce portal or service desk for future visits.
2. Service Booking & Job Card Creation: Customers request services online. Job Cards are automatically generated using Salesforce Flows, and mechanics are assigned based on workload and skills
3. Mechanic Assignment & Workflow Automation: Mechanics receive real-time notifications and update progress using Case Milestones. Customers receive automated email/SMS updates.
4. Inventory & Spare Parts Management: Tracks stock levels, generates alerts, and auto-adjusts inventory when parts are used.
5. Billing, Estimates & Invoicing: Automatic invoice generation based on labor and parts. Billing history stored for future reference.
6. Reports & Dashboards: Admins can view service count, revenue, mechanic performance, inventory usage, and customer trends.
7. Role-Based Access Control: Profiles for Admin, Mechanic, Customer, Inventory Manager ensure secure and structured access.

How It Works:

1. Customer books a vehicle service online or at the service desk.
2. The system generates a Job Card and assigns a mechanic automatically.
3. Mechanic updates service progress in real time.
4. Inventory updates automatically when spare parts are used.
5. Customer receives service updates and invoice.
6. Admin monitors operations using dashboards and reports.

The Garage Management System ensures a transparent, automated, and efficient garage workflow. It improves service quality, customer satisfaction, mechanic productivity, inventory accuracy, and billing speed. This Salesforce-based solution allows garages to operate faster, smarter, and with complete visibility.
