

REQUIREMENT ANALYSIS

Solution Requirements

Date	01 NOV 2025
Team ID	NM2025TMID05906
Project Name	Garage Management System
Maximum Marks	4 Marks

Functional Requirements

Requirement ID	Description
FR1	The system should allow customers and vehicle owners to register and log in.
FR2	Customers should be able to book vehicle service appointments online.
FR3	Service advisors/technicians must receive automated notifications for new bookings.
FR4	The system should allow technicians to update service status (In Progress, Completed).
FR5	Admin should be able to manage garage staff, services, pricing, and schedules.
FR6	The system should generate invoices automatically after service completion.
FR7	Customers should receive real-time updates via notifications.
FR8	Admin should be able to view dashboards showing service count, revenue, and technicians.
FR9	System must maintain vehicle history including repairs, parts used, and service dates.

Non-Functional Requirements

Type	Description
Performance	The system should process bookings and load dashboards within seconds.
Reliability	Data should be safely stored in the Salesforce cloud with minimal downtime.
Scalability	Should support thousands of customers, vehicles, and service records simultaneously.
Usability	Should provide an easy-to-use Lightning interface for staff and customers.
Security	Must include role-based access control (Admin, Technician, Customer)
Availability	System should be available 24/7 for customer bookings.
Maintainability	Easy configuration using Salesforce Flows, Objects, and Automation
