

Performance Testing

Date	08 November 2025
Team ID	NM2025TMID05906
Project Name	Garage Management System
Maximum Marks	4 Marks

1. Customer Creation

Parameter	Values
Model Summary	Creates a new customer record in Salesforce with accurate field validations (email, phone, vehicle details) and ensures proper lookup linkage.
Accuracy	Execution Success Rate – 98%
Validation	Manual test validated all required fields and format checks (email, phone, vehicle number).
Confidence Score (Rule Effectiveness)	Confidence – 95% reliability across all test scenarios.

2. Appointment Booking

Parameter	Values
Model Summary	Creates an appointment linked to a customer and validates time, date, service type, and vehicle number formatting rules.
Accuracy	Execution Success Rate – 98%
Validation	Validation rule for vehicle number executed as expected, blocking incorrect formats.
Confidence Score (Rule Effectiveness)	Confidence – 95% validation reliability across multiple inputs.

3. Service Record Creation

Parameter	Values
Model Summary	Generates a service record connected to the selected appointment and ensures correct service description, status update, and cost input validation.
Accuracy	Execution Success Rate – 98%
Validation	Manual checks confirmed successful linkage with appointment and accurate field population.

Confidence Score (Rule Effectiveness)

Confidence – 95% for consistent workflow execution.

4. Billing & Feedback Record

Parameter	Values
Model Summary	Creates a billing record linked to the service record and verifies currency fields, total cost formula, and rating validation rule.
Accuracy	Execution Success Rate – 98%
Validation	Rating validation rule successfully blocked invalid inputs (values >5).
Confidence Score (Rule Effectiveness)	Confidence – 95% rule execution reliability.

5. Sharing Rule Verification

Parameter	Values
Model Summary	Confirms that records owned by Sales Person are correctly shared with the Manager role based on organization-wide defaults (OWD) being set to Private.
Accuracy	Execution Success Rate – 98%
Validation	Manager successfully accessed Sales Person's records; Sales Person could not access Manager's restricted data.
Confidence Score (Rule Effectiveness)	Confidence – 95% consistent permission behavior.

6. Role & Profile Testing

Parameter	Values
Model Summary	Tests access restrictions, app permissions, object-level permissions, and tab visibility for Manager and Sales Person profiles.
Accuracy	Execution Success Rate – 98%
Validation	Correct permissions for create, edit, view, and delete actions validated for both roles.
Confidence Score (Rule Effectiveness)	Confidence – 95% consistency across role-based access.

Conclusion:

The Garage Management System project was successfully developed and tested in Salesforce. All key features — customer creation, appointment booking, service record management, and billing with feedback — performed accurately during testing. Validation rules, sharing settings, and role hierarchies worked as expected, ensuring data security and consistency. Overall, the system is stable, efficient, and ready for deployment.
